

# Powered For Success

**COLBEN ENERGY (CAMBODIA) LIMITED** is a Full Fledged Integrated Power Producer and a member of Asiatic Group (Holdings) Limited listed on the Singapore Exchange Limited (SGX).

With accumulated wealth of experience in this business, we continue to strive for excellence and apply the most economical and environmentally friendly technologies to achieve greater commercial success across Asia.

## Playing a pivotal role in the Energy Market in the Royal Kingdom of Cambodia:

### **Power Plant in Phnom Penh, the Capital City of Cambodia**

The Colben Energy Power Plant in Phnom Penh consists of 3 Generator sets with a total Generating Capacity of 14.8MW. All Generator sets are designed to operate with Heavy Fuel oil and Diesel Fuel. Twin overhead lines with a run of approximately 3.5 km long are connecting the 22,000 Volts switchboard of the Power Plant with the 22,000 Volts Government grid switchboard. The plant is in Commercial Operation since 1st Nov.2006.

### **Power Plant in Sihanoukville, the Beach Resort City of Cambodia**

The Colben Energy Power Plant in Sihanoukville consists of 2 Generator sets with a total Generating Capacity of 8MW. Both Generator sets are designed to operate with Heavy Fuel oil and Diesel Fuel. The 22,000 Volts switchboard is connected to the Government grid and Dispatch Control Centre. The plant is in Commercial Operation since 1st Nov.2006.

### **Dedicated Power Plant for Phnom Penh Special Economic Zone, Cambodia**

Colben Energy (Cambodia) PPSEZ Limited is the Joint Venture partner of Phnom Penh Special Economic Zone (PPSEZ). We are responsible for Generation & Supply of Electricity for the complete PPSEZ premise (estimate 400 hectares), which is located near Phnom Penh International Airport, Cambodia. The project has commenced in May 2007. Phase one of the plant is scheduled to complete by early 2008 with a Generation capacity of 15MW.

#### **We offer:**

- Vast expertise in the field of Engineering, Procurement and Construction (EPC)
- Leading technologies in the control of Emission and plant operation efficiency
- Total solution in Operation & Maintenance (O&M) Contracting
- Equity investment in Power Plant projects in the region
- Planning & Development services

#### **Our Energy Portfolio includes:**

- Cogeneration Plants
- Biomass Power Plants
- Hydro power plants
- Fossil Fuel Power Plants
